Tomáš Kaukič

ABOUT ME

I'm an IT engineer with a solid background in email migrations, backup solutions, and system administration. I helped multiple companies eliminate PST files by migrating 100TiB+ of data to the cloud. This experience taught me to enjoy investigating and troubleshooting complex technical issues.

Currently, I'm learning more about cloud computing and recently earned my Microsoft Azure AZ-104 certification. My goal is to transition into a Cloud Engineering role, where I can use my problem-solving skills and continue learning.
